

We need you.

Salary range: 53.000€ - 85.000€

kununu is the Europe's leading platform for workplace insights and information about corporate culture and salary. On kununu, you find authentic reviews from employees, applicants and trainees – available for free and anonymously. We believe that life is too short to spend it in the wrong company. With over 5 million reviews across 1 million companies, we are empowering people to choose the right place to work by creating a more transparent and fairer working world. And you can be a part of it! #kununujob

Your Tasks

- Popular technologies and tools like JavaScript, React, PHP, Playwright, Testmo, Tekton, Elasticsearch, AWS, and NewRelic... are used
- Work in our cross-functional team being responsible for the quality of our product and delivery
- You own product quality from start to finish: beginning once a feature is defined together with our PO's and ready to enter a sprint and ends after it's delivered;
- Within this process, you will decide which tests need to be automated and which ones should be performed manually. Also, you will consult and teach your team in order to get the right mix of tests
- You will make QA as efficient as possible, introducing new tools and also making our continuous deployment pipeline as fast as possible
- You will keep an eye on our bugs and derive measures to improve based on the patterns in our bug reports
- A highly tech-diverse environment with Backend and Frontend testing responsibilities

Your Skills

- You know your way around open source test-automation tools as well as manual software testing in a web environment
- You have good experience with test automation tools and frameworks (e.g., WebdriverIO, Playwright, Selenium, Mocha)

- You have experience in one scripting or programming language (e.g. JS, PHP);
- You have experience with version control systems (e.g. Git) and continuous integration (e.g. Tekton)
- You have knowledge in SQL databases, ideally MySQL and API's;
- Experience with BDD test frameworks is a plus
- Experience with kubernetes and Tekton is a plus
- Experience with mobile testing is a plus
- You have a good understanding of distributed environments
- Excellent problem-solving skills and attention to detail. You're into agile methodologies and enjoy working in teams with a focus on sharing knowledge

Your Benefits

- Bring your dog to the office
- Up to 12 weeks Workation
- 6 week vacation
- Mobile devices also for private use
- Drinks, food & goodies
- Remote work option
- Trust-based working hours
- Communication on equal terms
- Transparent, competitive salary
- Board Q&A
